

No Cost Income Stream Blueprint

Part 83: Traffic - Document Sharing

LEGAL NOTICE: The Publishers have strived to be as accurate and complete as possible in the creation of this report, notwithstanding the fact that they do not warrant or represent at any time that the contents within are accurate due to the rapidly changing nature of the Internet.

While all attempts have been made to verify information provided in this publication, the Publisher assumes no responsibility for errors, omissions, or contrary interpretation of the subject matter herein. Any perceived slights of specific persons, peoples, or organizations are unintentional.

In practical advice books, like anything else in life, there are no guarantees of income made or any other specific results. Readers are cautioned to rely on their own judgment about their individual circumstances to act accordingly.

This publication is not intended for use as a source of legal, business, accounting or financial advice. All readers are advised to seek services of competent professionals in legal, business, accounting, and finance fields.

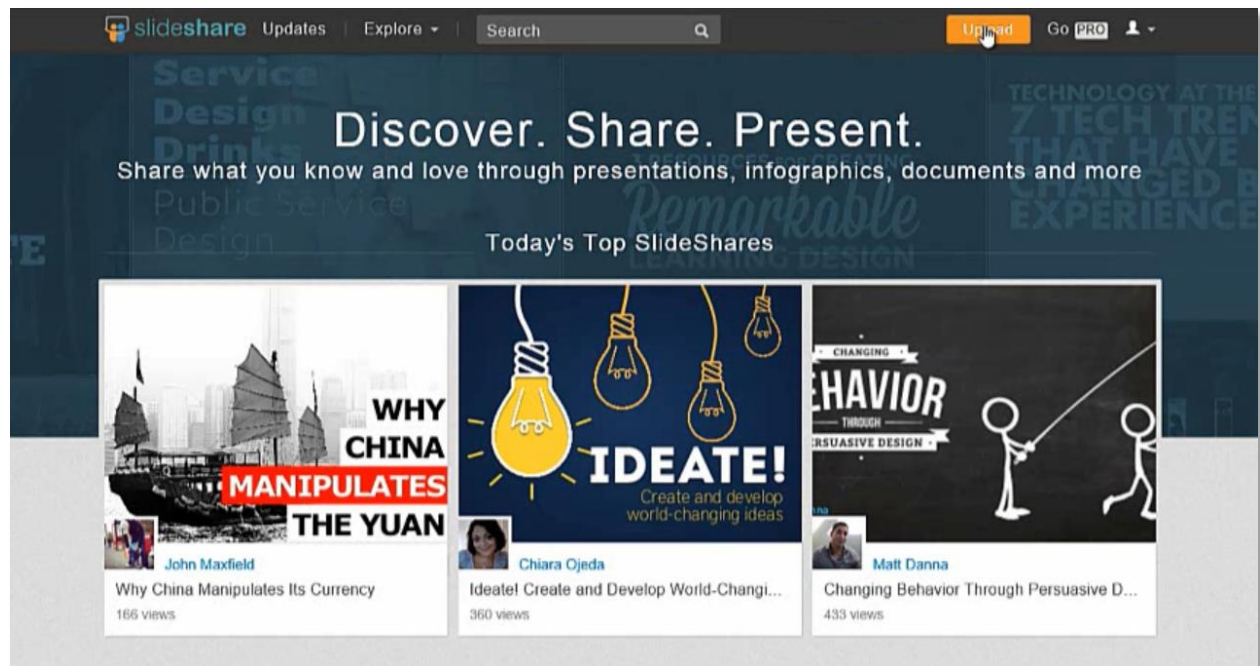

In this lesson, I will discuss the power of document sharing websites.

They are also referred to as slide sharing websites. These are websites like www.slideshare.net. They have many high network users. They have plenty of money and they are high level professionals. To use an account like www.slideshare.net, you do need to have a professional account like LinkedIn or Facebook.

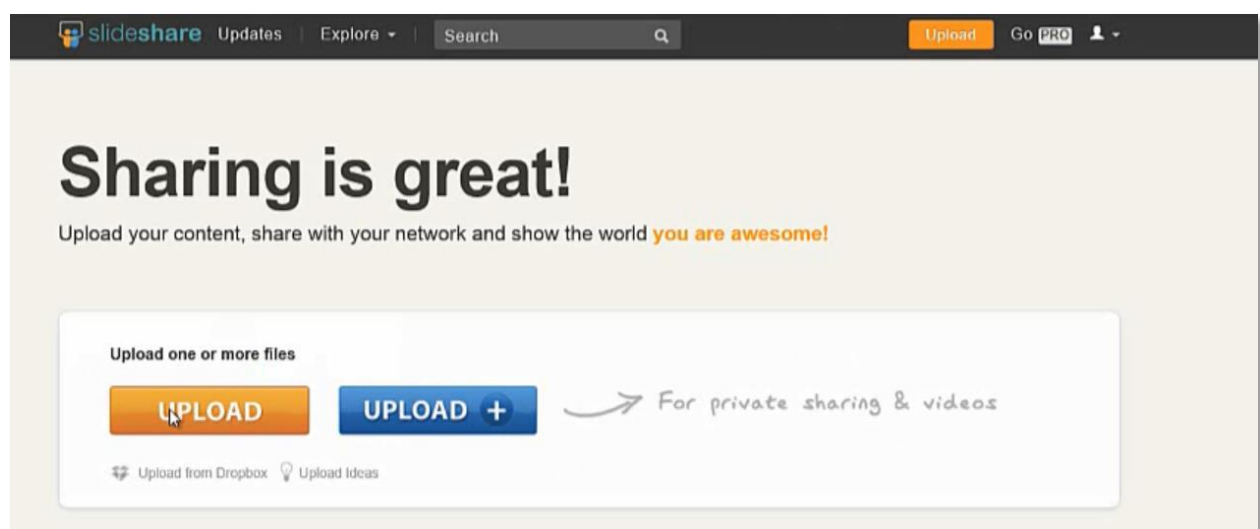

You want to make sure you are established in your niche market before you sign up for any document sharing site and share content. You need to be very focused on your niche and that it is your permanent niche. You can use another site or you can just skip this step and go back to www.slideshare.net once you are more established.

This site has a free and a paid option. Login with your account. The process I am going to share here to upload my document is almost identical with just about any slide share site. I am just using this one for our example.

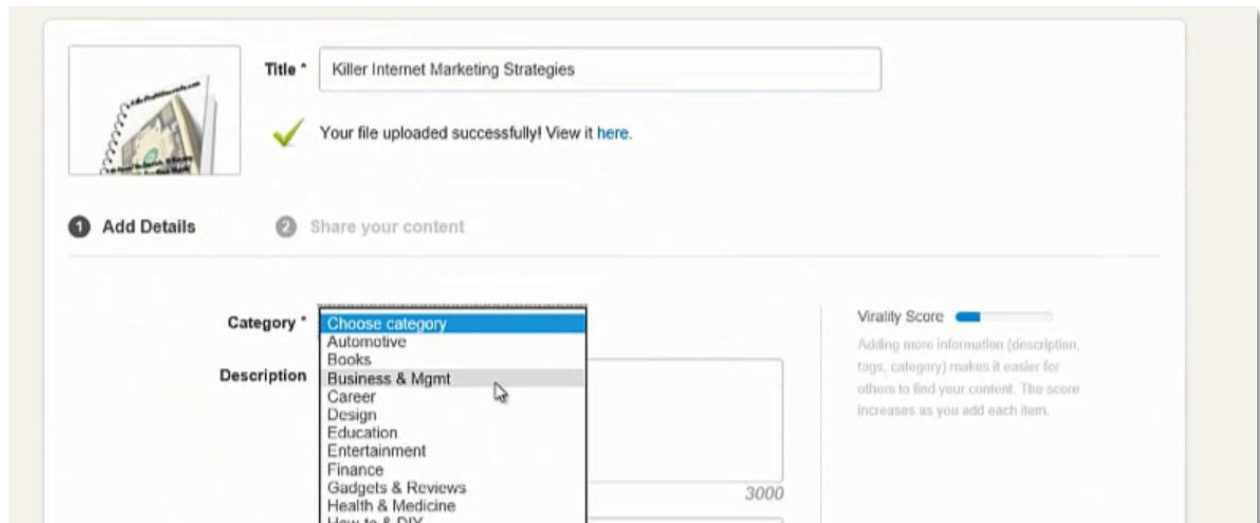

First, Click on **Upload**.

That will take you to a page where you can upload the content. I am going to browse my computer to find the file I want to upload.

For the **title** of the product, you want to select something in your niche. In this example, I will use internet marketing as my category so that would fall under business.

Title * Killer Internet Marketing Strategies

Virality Score 
Adding more information (description, tags, category) makes it easier for others to find your content. The score increases as you add each item.

You need a **description** for it and then you need to add **tags**. Give them key reasons to read your file. Tags should include your main keywords. Make sure you set it to public and then you can **save and continue**.

Adding more information (description, tags, category) makes it easier for others to find your content. The score increases as you add each item.

All document sharing websites are set up very similar in nature. You just upload, put in a keyword rich title, put in a good description, and put in your tags. You don't want heavy links all over. Maybe one link at the introduction or the end. Make sure you read the terms and conditions of these types of websites.

With www.edocr.com, you will have to provide a multitude of information about you and about your business when you sign up. You want to be careful about how much information you share with them.

The next site to consider that is www.4shared.com.

Another one you can consider is www.powershow.com.

There are many others you can find just by typing in Free Slide Sharing Sites into Google. Put it into quotes. You can also say Free Document Sharing Sites.

The reason that I recommend you search for it is that these websites are constantly changing. Any of them can be gone tomorrow. The ones I mentioned here are probably going to be around for a long time. They are larger than most and good websites to use. I encourage and recommend that you take advantage of slide sharing. It can generate an awful lot of traffic for your business.

Be careful, use it smart. **Don't SPAM them in any way.** Follow their rules and you will be fine. They can send you a nice, high quality amount of traffic. **If you aren't established in your niche though you should wait. You should go on with another traffic strategy.**

Special Bonuses:

1) How to build a real Internet business (Thousands of people have taken this free course and succeeded!)
