**In this lesson, we are going to go over step #7 of the No Cost Product Launch, which is to set up your download page.** This is the next part of the process. In this step, you are going to set up a download page or downloadable files. You will upload them to JV Zoo or to some other platform. It allows you to deliver your content from your sales page so your customers can get what they paid for.

This is a very important part of the process. **Without it, your customers don't get what they paid for.** If you don't do it correctly, you are stuck with a pile of support. You need to make sure you can successfully deliver your product. You can use a download page. It is a simple way for customers to get their files.

There is an alternative way, and that is what we recommend you use throughout the No Cost Product Launch. This process is to upload your file to JV Zoo. Then the customer will download a zip file that contains your product package. This can include your e-book, audios, videos, instructions, etc.

**They can download everything that you sold to them right from the JV Zoo account.** This is the best way to go about it. Then you don't have to worry about web hosting. You don't have to worry about a free web hosting program removing your files. That is the approach we take here because we are all about doing it at no cost. We want you to use the tools offered.

You can also offer downloads through creating a page at [www.wix.com](http://www.wix.com) or [www.weebly.com](http://www.weebly.com). They are both a good way to control your offers. You can also use them to promote upsell offers and affiliate offers. Offer links straight from your download links to make it easy.

**With JV Zoo, there is a way to do it through a PDF and that also links those buyers directly to your list.** That will actually be very helpful. Ideally, you will get to the point where you are generating money. Then it will make sense to invest in your own website hosting and your own domain.

That way, you can offer your own download pages from your own server. Again, we are all about this process right now for free. We want to make sure you understand how to get it set up and how it all works. You can launch your product without spending money. Then you can invest some of your profit to move forward from there in your business.

We are going to demonstrate how to set up your files for download, how to zip them up into a folder, and how to work with them in just a moment.
